

### Weather Impact

### INNOVATIVE WEATHER SERVICES FOR CLIMATE-SMART AGRICULTURE

#### SERVICES

- Weather Forecasting
- Weather and Climate Analytics
- Monitoring of Seasonal Weather Anomalies
- Timely Weather Alerts
- Climate Change Consultancy
- Local Agro-Meteo Advisories

#### WEATHER ANALYTICS AND CLIMATE SERVICES

Weather Impact is specialized in delivering tailored agri-weather forecasts and advisories to individual farmers and other stakeholders in the agri-food sector. In addition, we provide long- and short-term analysis of weather and climatology, which can be used as knowledge or data input for other services, like crop yield forecasts or seasonal comparisons. Our weather and climate services support optimal decision making for crop growers, producers and traders.

TAILORED WEATHER SOLUTIONS  
FOR AGRIBUSINESS

# SCALABLE WEATHER SOLUTIONS

## How we add value

To create reliable forecasts and analysis we combine output of state-of-the-art weather models, satellites and ground observations.

We have developed unique algorithms that are able to translate stochastic output to actable knowledge for farmers. Local validation or downscaling of weather model output is part of our expertise. Our solutions are tailored towards user needs.

Together with partners, we deliver for example weather forecasts per text message (SMS) to small scale farmers in Africa. When possible, we take into account local farm management and cropping cycles to provide a weather-based farm management advice.

## HydroNET

We develop our products in HydroNET, a decision-support service that provides intelligent solutions for operational and strategic water management. Smart web applications compose, analyze and visualize weather and water information in a series of useful maps and graphs.

HydroNET was developed by our business partner HydroLogic and is being used by partners in our community of over 130 organizations to develop new weather and water applications.

# HydroNET

## Work with us

Weather Impact cares about the earth and our climate. We believe data and advanced modelling can improve food supply while decreasing human impact on the environment. Work with us to:

- Enhance crop yields
- Improve crop scheduling and planning
- Provide automatic farming advice to farmers
- Reduce use of pesticides and other harmful substances
- Reduce financial risks
- Improve livelihoods of farmers

# NL-FSA

The NL-Food Security Alliance (NL-FSA) is a network of mainly Dutch companies and institutions developing exclusive and sustainable solutions in the agri-water-food-business.

NL-FSA is a Royal Eijkkelkamp initiative
